Using Piazza

How to Navigate the Board

Pinned discussions will always be at the top of the question feed. The Team has created folders for each assignment and exam for faster and easier navigation. The folders will appear on the top bar of the page. Also students must assign their questions to specific folders at the time of asking a new question. This is a way of keeping our class content organized.

Folders Preview:

comprehension_check1	comprehension_check2	comprehension_check3	comprehension_check4
comprehension_check5	comprehension_check6	comprehension_check7	comprehension_check8

Search Existing Posts

Enter your search term into the search box at the top of the question feed to filter the feed by that term.

🔍 Search or add a post...

Asking Questions

First search the forum for a similar question that may already have been answered. Try to be very clear and specific in your search terms. Remember to be patient and keep searching for similar questions.
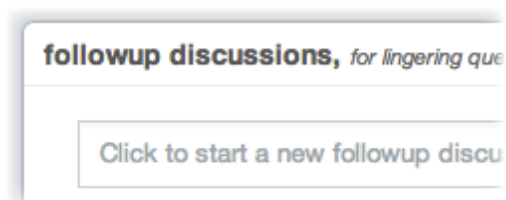

If you cannot find a satisfactory answer, ask a question by clicking the **New Post** button at the top of the question feed. Select the **Question** tab, enter a brief question title, and fill out the question details. Choose what folder your question should go in (e.g. lab1) to make it easier to search for your post.

Unanswered questions are highlighted in red in the question feed until they have a response.

Answering Questions

To comment on a question, click within the textbox labeled **Click to start a new followup discussion** at the bottom of the post. Here is where students can comment and exchange ideas on a specific topic.

FAQs

Please review these frequently asked questions for further assistance in navigating Piazza.

Help

EdX offers interactive online classes and MOOCs from the world's best universities. Online courses from MITx, HarvardX, BerkeleyX, UTx and many other universities. Topics include biology, business, chemistry, computer science, economics, finance, electronics, engineering, food and nutrition, history, humanities, law, literature, math, medicine, music, philosophy, physics, science, statistics and more. EdX is a non-profit online initiative created by founding partners Harvard and MIT.
